Part of Program for Comfort and Convenience of G. A. R. Reunion Visitors.

These three booths are to be placed in charge of high school boys placed in charge of high school boys and are to be opened two days before the date set for the G. A. R. reunion. The high school boys are to work in squads of twenty-five each in shifts of four hours each, and are to be under the direction of a cadet officer. To facilitate this plan the information committee has advised the executive committee to ask the school authorities to close the schools during the reunion.

Co-operation of the accommodation committee has been solicited, and lists of boarding houses and hotels where accommodations can be secured have been asked for. These are to be placed in each information booth. City directories and telephones also are to be placed in each booth, so that when a visitor applies at a booth for information as to where accommodations can be secured those in charge can refer to the list of hotels and boarding houses, telephone and see if accommodations are still available, and then a high school boy will accompany the applicant to the house or hotel and report back to the booth if satisfactory arrangements were made. Those in charge of these booths are to be provided with, official badges through arrangements made with William T. Galliher, chairman of the

Mr. Davis, as chairman of the information committee, has written letters to Clarence P. King, president of the Washington Railway and Electric Company, and to George E. Hamilton, president of the Capital Traction Company, asking that a vest pocket booklet of places along the line of the railways be distributed among the conductors to facilitate the work of informing strangers in the city. Mr. Davis points out that if the conductors are drilled to give correct information when they are asked visitors will be saved considerable inconvenience and time. He advises that all residents of the city brush up on the location of streets, public buildings and places of interest so that all may assist the information committee.

The medical committee, of which Dr. Lewis J. Battle is chairman, has selected a site for a field hospital in the White Lot, and Chairman Battle has made a requisition on the executive committee for a large sign to indicate the location of the hospital tent, as well as for signs to be placed on the information booths in Union station to indicate hospital room at that point. He has been allotted three rooms in the southeast corner on the first floor of the Emery (old census) building, and these rooms will be in charge of a physician and Red Cross nurses during the entire term of the encampment.

Candy was declared today to be "as great an evil to the child as liquor is to the adult." in a paper by Dr. Horace L Howe of Boston, read before the Panama-Pacific dental congress.

"The candy habit is an important cause toward undermining the health of the American child," Dr. Howe's paper said. "In front of almost every schoolhouse in the country there can be found a small candy store which sells cheap sweets to children. In Boston no saloons can be operated within a certain number of yards of schools. The same law might be applied to the selling of candy, as candy is as great an evil to the child as liquor is to the adult." be found a small candy store which sells cheap sweets to children. "A broken-down set of teeth in children is a serious menace to them and a great handicap in their future careers. "In several institutions in Boston in-fectious diseases among children have been practically eliminated by giving dental care and enforcing mouth hygiene."

The Mileage is There Do You Get It?

To Men Whose Tires Cost Too Much

We never quote the remarkable mileages attained on Goodyear tires. But such reports

come by the hundreds. Some men are careful, some careless. Some use big-enough tires and some don't. Roads and conditions differ. So does luck. And mileage varies likewise.

But We Do This:

In every Goodyear Fortified Tire we give you all we know to minimize cost per mile.

We embody five great features used by no other maker. We give you other extras which are rare. And just those extras will this year cost us \$1,635,000.

We make our anti-skid-the Goodyear All-Weather-a double-thick tread. That double thickness on this year's output of this type will cost us a million dollars.

ditions in rubber and size —will cost us \$500,000.

And this year's addi-

tions - unasked-for ad-

Extra Service Sure Such things make extra service certain. Some TOOD Fortified Tires Rim-Cuts—by our No-Rim-Cut feature. Blowouts—by our "On-Air" cure. Loose Treads—by many rubber rivets. Insecurity—by 126 braided piano wires. Punctures and Skidding—by our double-thick All-Weather tread.

get it in big measure, some in less. That depends on the user largely-on factors we can't control.

But note this: Some two million Goodyear

tires are constantly in use. They cover bil-

lions of miles in a year, meeting all conditions. Their average service has made Goodyear the dominant tire of the world. It outsells any other. Its users have almost doubled in two

The extra service is there. Hundreds of thousands have found it. It waits for you in every Goodyear tire. But its extent will depend on yourself somewhat, just as with any tire.

That's why we establish in every neighborhood Goodyear service stations. Dealers who carry Goodyear tires know how to care for them. Get their advice—their helps.

In Goodyears we give you greater value than any other maker gives. Our mammoth output enables us to do it.

> further. We have trebled our Service Stations in the past year to help you get that value out. (2631)
